Project 2 Teamwork Assessment

1. Who was your team member in this project?
   Jiayi Wang, Zekun Wang

2. What did you like and dislike about working as a team on this project? (3-4 lines)

Like: First of all, we have a lot of freedom to choose whatever dataset and whatever front-end application. Secondly, the project is very comprehensive which almost includes everything we learned from this class, and it helps us remember those important concepts and functions.

Dislike: I have zero front-end experience and would like to receive some help for implementing the front-end during previous classes.

3. Based on your best estimation, how much work did each team member contribute (Name and percentage)?

Jiayi Wang 50%
Zekun Wang 50%

4. Describe the effort put in by each team member on this project? Who did what?
   (1-2 paragraph)

Jiayi did the database part. She cleaned the data, completed the UML after normalization and created the database. She also wrote the report.
Zekun did the front-end which is very time-consuming. He also finished creating the demo video.
